BRIDGEBANK AND CRUGGLETON

THE sale of the late Albert James Marshall's Shorthorn Herd, for long the largest in Britain, is a milestone in Shorthorn History, and the number, reputation, and sound pedigrees of the cattle afford Breeders the opportunity to enrich their herds, and benefit from the life-work of an unrivalled Master, who, to the end, was still achieving and still pursuing.

Mr. Marshall's instinctive genius, fostered from his youth, was matured by experience in Argentina, broadened by frequent contact with the skilled Cattlemen of many countries, and established by his own operations on an ever-increasing scale on the healthy lands of the Machars of Wigtown; and the result is that, in the Herd he built up and which is now to be dispersed, there is worth which cannot be overestimated.

He joyed in the strenuous competition of Showyard and Sale Ring, and throughout his career never flinched from matching his cattle against the best that could be brought against them. At Show and Mart, at home and overseas, the successes achieved were phenomenal and consistent, and the prizes won, and prices obtained, testify to the merit of the Stock in the eyes of those best qualified to judge.

Bridgebank and Cruggleton-bred cattle have been outstanding winners at every Show of any importance throughout the world, and hold a reputation second to none. Amongst many others, recent successes include:—

1949. Perth—Supreme champion, Cruggleton Account, sold for 7000 guineas.

1950. Cruggleton Pacha carried all before him in South Africa, and won the Rand Championship.

1951. R.A.S.E.—Female and supreme champion, Rosewood Rapture by Cruggleton Perfect. Perth—Twenty-eight bulls averaged £711 9s.—with Cruggleton Pandelus making 5500 guineas to Australia; Cruggleton Raeside, 4500 guineas; and Cruggleton Balmoral, 3000 guineas. Royal Highland Show—1st and junior champion, Cruggleton Aureate out of Augusta Angelica.

1952. Perth—Reserve supreme champion, Cruggleton Leishman, sold for 3000 guineas to the U.S.A.; Cruggleton Justinian and Cruggleton Pennywell, sold at 4200 guineas each; Cruggleton Purdon sold for 2100 guineas to South Africa; and Cruggleton Bayard, sold to Mr. James Durno at 1450 guineas. At the recent Royal Easter Show at Sydney—(1) the champion female was by Cruggleton Orangeman; (2) the reserve champion bull was out of Augusta Mavourneen, bred at Cruggleton, and also dam of the reserve champion bull by Cruggleton Assheton, in 1951, sold at the record price for

an Australian-bred bull; and (3) this year's reserve champion bull was by Chapelton Ambassador, who was out of a cow by Cruggleton Perfect. Chapelton Ambassador also won the sire's progeny prize for two bulls and two females.

Mr. Marshall's favourite families, Augusta and Princess Royal, have been bred in the Herd for many generations, and from the former came the great Show cow, Augusta Melissa, champion at the R.A.S.E. and Highland Shows. Other distinguished and virile female lines are:—Clara, Rosebud, Clipper, Blythesome, Kilblean Beauty, Queen of Rothes, Secret, Averde (Jolliffe's), Nonpareil, Newton Jealousy, Lavender, Victoria, Butterfly, and Buttercup.

From the beginning, the stock bulls, sheet-anchors of success, have been outstanding, and the best procurable, as evidenced by such impressive sires as the Beaufort Castle-bred Broadhooks Viceroy 2nd; Mr. Jolliffe's Primrose Knight; Roan Conqueror; Gainford Ringleader; the three-times Highland Show champion, Bridgebank Paymaster; Edgcote Hero, the 1919 Dublin, Belfast, and Highland Shows' champion; Collynie Royal Leader, and Balcairn Baronet. During the last twenty years the majority of the stock bulls have been bred in the Herd, and include Cruggleton Captivator, Willingdon, Perfect, Brunel, Adjuster, Achilles, Annexe, Braemar, Assheton, and Elvin.

The Herd has been Attested for many years, and the cattle live out under natural conditions all the year round, and have always proved great thrivers in other lands, at home and overseas. At its peak, numerically, the Herd comprised some 800 head, but two Draft Sales since the war reduced the numbers to those now catalogued. Characteristic, good, and uniform though the cattle were, disposed of at those Draft Sales, there is no doubt that the reduction in numbers considerably enhanced the value of those retained under the direct control of the Master Mind.

These cattle are unimpeachable in breeding, distinguished by uniformity and beauty of head, richness of hair and colour, mellowness of flesh, shapeliness of udder, with the symmetry and breed character so sought after, and of inestimable value when found.

The Sale comprises the entire Herd, with the exception of this season's crop of bull calves, which will be sold at Perth in February, 1953.

Opportunity is often lost by pausing, and the opportunity, which can never recur, afforded by this Sale, is so great that no one seeking the soundest type of Shorthorns can hesitate to take advantage of it.

T. B. MARSON.

CONDITIONS OF SALE

1. The Cattle will be exposed separately according to the numbers in the following Catalogue. The Auctioneers reserve the right to refuse any bid without assigning any reason. The highest offerer of each lot will be preferred to the purchase—each offer exceeding the former by at least one guinea.

2. Immediately after each purchase is declared, the risk of the animal shall be exclusively with the Buyer, and it is declared that until a settlement shall be made in terms of these Conditions the delivery of the animal shall be suspended. The right of property shall not pass until the price is paid.

3. Immediately after the Sale all lots must be paid for in cash to the Auctioneers. The price being paid, each lot shall be taken away at the Buyer's expense within one day after the sale thereof. Lots shall only be removeable from the Auctioneers' possession on a written order from their clerk, and any lot removed in contravention of this condition may be recovered *brevi manu* by the Auctioneers.

4. Should any Buyer fail to pay for and remove his purchase in compliance with the above Conditions, the Auctioneers in their option may either (a) sue the Buyer for the price and interest thereon at the rate of *Six per Centum per Annum* and for the keep of, and any other expense incurred by them in connection with such purchase, or (b) re-sell the Lot either publicly or privately and recover from the defaulting buyer the deficiency (if any) attending such re-sale and interest thereon as aforesaid together with the keep and all other expenses. In either case, the Auctioneers shall have the right to sue at their own instance without the consent of the Owner or Consigner, and no defence whatever in such action shall be competent to the Buyer who shall have recourse against the Owner or Consigner alone.

5. No undertaking of the Auctioneers or their servants to take charge of any animal after the Sale or to forward it to its destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of the foregoing conditions.

6. The Auctioneer is appointed Judge of the Sale, to whom are hereby submitted all disputes and differences of any kind which may arise at and in relation to the Auction, either between Exposers and Offerers or among Offerers themselves. His decision shall be final and binding on all parties.

AUCTION MARKET OFFICES,
PERTH, 1952.

TESTS

The whole herd is Attested. The Single Intradermal Comparative Tuberculin Test has been carried out on the Craggleton and Palmallet cattle between the 18th and 28th August, 1952, by James Edgar, M.R.C.V.S., Whithorn, with negative results. The measurements are given in millimeters under each pedigree, so that any avian reactors can be identified.

The 24 Bridgebank cattle were tested by John Forster, M.R.C.V.S., Stranraer, on the 14th/17th July, 1952, with negative results, and measurements are given under the pedigrees.

All females born up to 30th September, 1951, have been inoculated with Strain 19, and the dates of inoculations are shown, where known.

The heifer calves born since 1st October, 1951, have not been inoculated.

The Agglutination Test for Brucellosis has been carried out on the whole herd, by the Wellcome Research Laboratories, between the 18th and 28th August, 1952, and the results are shown. Individual certificates can be provided where necessary.

No re-tests can be given, and buyers will require to satisfy themselves that the tests shown in the catalogue will meet their requirements.

Cattle bought for export can be taken back to the farms, where they will be kept free of charge for a period of three months, and for a further three months at a charge of £1 per week. Thereafter, buyers will require to make their own arrangements.
